

8,000,000 TONS SHIPPING IN 1918

Half Will Be Built in America, Says George J. Baldwin

PRELIMINARY STAGES OF BUILDING OVER

Actual Race for Speedy Construction Under Way

Chicago, April 12.—American shipbuilding, the most vital factor in American war activities, was discussed by one in the thick of the practical work yesterday at the meeting of the shipping section of the Chamber of Commerce of the United States, which is holding its sixth annual meeting here.

The speaker was George J. Baldwin, chairman of the board of the American International Shipbuilding corporation, which operates the Hog Island and two other yards, president of the Pacific Mail Steamship company and chairman of the board of the New York Shipbuilding Co. Mr. Baldwin expressed the view, now shared in many quarters, that the construction of 4,000,000 deadweight tons of shipping can be expected of American yards in 1918. He estimated approximately the same tonnage from other countries.

He asserted that the preliminary stage of the building of fabricated ships is over and the actual race for speedy construction under way. He thought the maximum efforts of the U-boats had been reached. In 1919, he said, American shipbuilding would be in full swing, fulfilling all demands upon it.

Speed, according to Crawford Vaughn, former premier of South America, in his address on "Labor in Shipyards," should be America's battle cry. "There must,

New Vapor Way of Treating all Cold Troubles

North Carolina Druggist Invents a Salve That is Vaporized by the Body Heat

NOTHING TO SWALLOW YOU JUST RUB IT ON

Particularly Valuable to Mothers with Small Children. Local Druggists Are Offering 25c Jars on 30 Days' Trial.

Colds are simply inflammations of the air passages and everybody knows that the only way to reach the air passages direct is by means of vapors that can be inhaled. The old-fashioned vapor treatments however, were cumbersome and costly, but a North Carolina druggist solved this problem by inventing a salve that is vaporized by the body heat.

This preparation, known as Vick's VapoRub, is now being introduced here. The local druggists know the danger of constant "dosing," especially to small children and are anxious that all their customers should try this new "outside" treatment. Arrangements have accordingly been made with the manufacturers to sell the small size jars, price 25c, on 30 days' trial—no charge to be made if the customer is not delighted with the results.

For deep chest colds, sore throat, bronchitis, tonsillitis, or incipient pneumonia VapoRub should be applied over the throat and chest and covered with a warm flannel cloth. The vapors arising carry the medication with each breath, to the air passages and lungs. In addition VapoRub is absorbed through and stimulates the skin taking out that tightness and soreness in the chest.

For head colds, hay fever, catarrh or asthmatic troubles VapoRub can either be applied up the nostrils or a little melted in a spoon and the vapors inhaled. Croup is usually relieved within fifteen minutes and one application at bedtime prevents a night attack.

MRS. LEWIS OF BROOKLYN

Tells How She Was Made Well by Lydia E. Pinkham's Vegetable Compound.

Brooklyn, N. Y.—"For one year I

was miserable from a displacement, which caused a general run-down condition with headaches and pains in my side. My sister induced me to try Lydia E. Pinkham's Vegetable Compound. I found it helped me very much and such a splendid tonic that I am recommending it to any woman who has similar troubles."

—Mrs. ELSIE G. LEWIS, 30 Vernon Ave., Brooklyn, N. Y. Such conditions as Mrs. Lewis suffered from may be caused by a fall or a general weakened run-down condition of the system, and the most successful remedy to restore strength to muscles and tissue and bring about a normal healthy condition—has proved to be this famous root and herb medicine, Lydia E. Pinkham's Vegetable Compound.

If you have disturbing symptoms you do not understand write Lydia E. Pinkham Medicine Co., Lynn, Mass. The result of their 40 years experience is at your service.

however, be no immoderate and wasteful haste," he added, "and this motto should be interpreted by practical men in a practical way. If the output of America in 1918 totals 3,000,000 gross tons, America will have done well," he said.

Alba B. Johnson, president of the Baldwin Locomotive works, speaking of the taking over by the government of the railroads, pointed out the numerous advantages of standardization of locomotive construction, but added that it entailed the possibility of the "paralysis of invention and the stagnation of improvements."

Secretary of the Navy Josephus Daniels and Secretary of the Interior Franklin K. Lane, who came to Chicago in connection with the Chamber of Commerce convention, yesterday addressed trade paper editors and publishers. Each told of the work of his department in connection with the war. Each addressed the convention Thursday night, Secretary Daniels urging "ships and still more ships," and Secretary Lane saying that the slogan must be "use all to win the war."

The earl of Reading, British ambassador to the United States, spoke at the Auditorium last night.

ANOTHER EVIDENCE OF IMMENSITY OF THIS WAR

Army of 140,000 Lawyers Enlisted to Uncover Enemy Property in This Country.

Washington, April 12.—An army of 140,000 lawyers in the United States was enlisted yesterday in the campaign to uncover enemy property. A Mitchell Palmer, alien property custodian, in a letter sent to attorneys in every state, called on them to locate and report to his office all funds held by the enemy in the vicinities in which they live.

"Property aggregating in value many millions of dollars has been reported and taken over, but it is confidently believed that at least as much, if not more, is still unreported," his letter said. "The duty of locating and reporting such property is placed by law not upon this office, but upon the individual citizen. It is here that I need your help."

NO "GRADUATES" FROM 3D CAMP.

Men Go Back as Privates and Take Chances.

Washington, April 12.—There will be no graduates from the third and subsequent officers' training camps, and the men given training will go back into their organization as privates and non-commissioned officers to await commissions as their services are needed.

The men trained, the war department announced yesterday, will wear white arm bands to distinguish them from their fellows. They will be known as eligibles, and will be classified according to the grades they made in training.

BETHEL

Sugar Makers Report Good Success Up to Date.

Several early sugar makers already report this season's product above the average, while J. A. Perley, who has made 500 pounds of sugar from 330 bushels, declares his product to be the largest he has made in the nine years of his residence here. The late bushes report half the usual quantity made with a prospect of another good run after the present cold spell.

Miss Nellie Blake has been secured as a substitute for Miss Jessie Putney as teacher of the Mountain school, where the spring term opens April 22. Miss Putney is ill and will be unable to resume her work for several weeks.

Rev. W. C. Harvey and A. Lee Cady were at East Bethel yesterday afternoon to attend the funeral of Edwin P. Gifford.

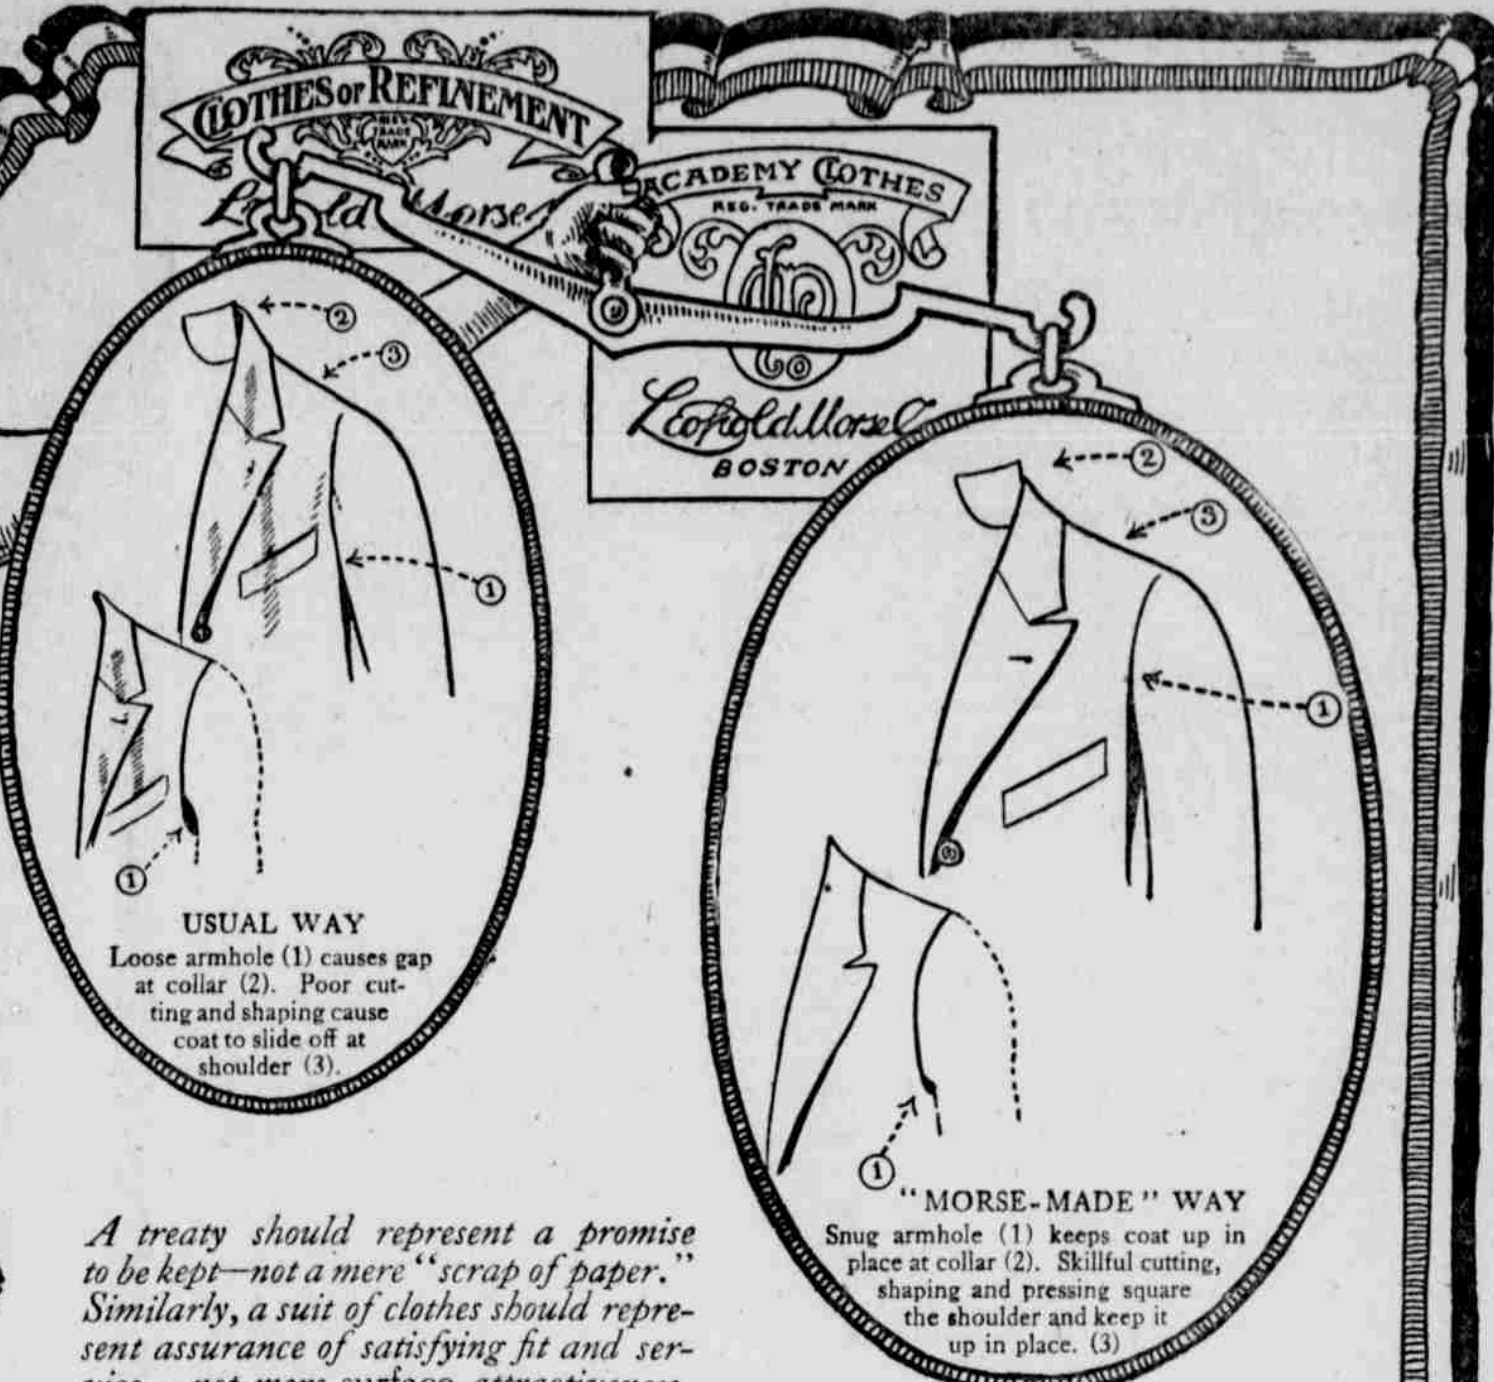

Miss Marion Bullard, the Red Cross nurse, writes from Lakewood, N. J., that she is with several hundred nurses at the U. S. general hospital No. 9, formerly the Lakewood hotel. She writes that she is studying French and the metric system. Mrs. D. A. Wilson and son, Roger, of Barre are visiting at W. W. Wilbur's.

The cemetery commissioners probably will complete this year the fence begun last fall around the Lympus cemetery, which everyone agreed was much needed.

L. E. Dean, who had been working at F. B. Wright's market, is back in his old place at J. S. Kimball & Co's, while G. W. Newton, long employed at Kimball's, is now working at Wright's.

There will be a Red Cross benefit at the town hall next Monday. Children's party from 3:30 to 5:30. Sugar party and cake walk at 8 o'clock.

In tomorrow's baseball game at Randolph Center it is quite sure that "Jumbo" Regan will do the pitching for Whitcomb high school, but there is no certainty yet who will catch his shots. Harold King is pretty sure to cover first sack. Newton second and Marshall third. Captain Wilson will play at short, as formerly while the hardest hitters from among the other players, probably including Lavere, will do the outfield work.

A treaty should represent a promise to be kept—not a mere "scrap of paper." Similarly, a suit of clothes should represent assurance of satisfying fit and service—not mere surface attractiveness.

Above all else, the average American is keen for fair play. He believes that coats, like nations, should "stay put." He rightly insists that his coat shall hug the collar. But whether his coat's fit at the collar is temporary or permanent depends in great degree on just how the armhole has been cut.

The ordinary armhole is cut loose under the arm—the whole coat hangs from the collar. And since there is nothing to support the coat collar in place, it soon begins to sag from the shoulder, opening up a gap between coat collar and linen collar.

The armholes on all Leopold Morse coats are cut snug. They hug the arm pit, supporting the coat shoulder, and so holding the coat collar firmly up in place "for keeps."

Another point. Above the arm hole, the ordinary shoulder—now that padding has been eliminated—slopes like a "Queen Anne" roof till the coat seems in imminent danger of sliding off. The shoulders of Leopold Morse coats, on the other hand, are skillfully cut, shaped and pressed to give a squarer effect, yet without padding.

The Spring Models of Morse-Made Coats are ready. You are invited to call and see how much of style and service they give your clothing dollars!

SHIPYARD WORKERS BET ON THEIR SPEED

Making Large Wagers as to Which Yard Can Turn Out the Most Craft in Given Time.

Chicago, April 12.—Large wagers are being made by employees of shipyards on the Pacific coast and Atlantic coast

as to which can turn out wooden ships the faster, according to Meyer Bloomfield of Boston. The management of an Oregon shipyard wagered \$20,000 that its yard would turn out more ships in a given time than a company in Fore River, Mass. The employees of the Oregon yard requested that the employees might take over the entire bet. The report that Baltimore ship riveters had established a record brought a reply from San Francisco riveters, who reported a better record.

SOUTH CABOT

Mr. and Mrs. Aura Clark of Boston have been visiting at his father's, O. J. Clark, for the past few days.

Mr. and Mrs. Ernest Brown visited his father, Aaron Brown, who is quite low, in Marshfield Sunday.

Fred Healey is in Lanesboro, working for Mr. Gosling this week.

Mrs. Avon Hall and little daughter, Grace, visited Mrs. Hall's mother in Marshfield Sunday.

Edwin Flye of Danvers, Mass., is visiting his daughter, Mrs. Amos Peabody.

Edna Walbridge has returned to her home in Woodsville, N. H.

Blanche Hadlock returned to Willamstown Saturday after a week's visit at L. E. Woodward's.

Arthur Reed has been confined to the house the past two weeks with the measles.

Mr. and Mrs. George Heath have moved back from Cabot and are living on their farm.

Kathryn Maciver of Barre has been in the place, visiting friends. She expects to go Saturday to Weston, Sask., Can., to live.

Quite a party from Marshfield enjoyed a sugaring off at Edgar Kidder's last Sunday.

The pink-eye seems to be the prevailing distemper just now in these parts.

Supermarket's report a fine run of sap Saturday and Sunday. They are looking for still more runs.

TWO KILLED IN TRAIN CRASH.

Freights Collide on Canadian Pacific; Block Traffic.

Megantic, Que., April 12.—Two men were killed in a head-on collision of freight trains on the Canadian Pacific

here and other trainmen narrowly escaped injury. W. Wilson of Megantic, engineer of one of the freight trains, and Boulais Farnam were killed. The engines and several freight cars were demolished. The wreckage delayed traffic.

Any Sickness Leaves Weakness

Even a simple cold strips and reduces your resistive powers to allow other sickness. Only food—not alcohol or drugs—creates the rich blood which distributes strength to the body, and the concentrated medicinal food in

SCOTT'S EMULSION

makes the blood rich and stimulates its circulation while its tonic virtue enlivens the appetite and aids nutrition to reestablish your strength quickly and permanently. If you are rundown, anemic or nervous, by all means get Scott's Emulsion. It builds because it is a food—not a stimulant.
